Time: _____ AM/PM (Choose One)

School: _____

City/Town: _____

Weather Conditions: _____

- Are you at your school/school yard or your home/neighborhood?

School yard

Home/Neighborhood (Circle One)

Write some of the phenological happenings seen on the CWES Nature Navigator website for the week you will be observing.

Write some of the same phenological happenings you see today at your home or school that are also happening at CWES.

Write additional phenological observations you see that were not happening at CWES this week, or you are unsure about.

Choose an animal you observed today on the CWES Nature Navigator or at your school/home and make some predictions about it.

1. What types of habitat or places would this animal live?
2. What adaptations or characteristics of this animal allow it to live so well in its habitat?
3. What types of food does this animal eat? Did you see this animal eating this food?
4. What predators may eat this animal?
