

## FOLLOW-UP STUDY OF 2002 GRADUATES - NON-TEACHING

Career Services Office, University of Wisconsin-Stevens Point

---

This report provides data on the employment or continued educational status of UWSP students graduating in December 2001, May and August 2002. Research was completed within a year from the date of graduation, with the report compiled for release in the summer of 2003. Statistical information is provided, as is a detailed listing of job titles, employers and locations of graduates.

The Career Services staff made numerous attempts to collect data from each graduate, including e-mail and regular mailings, telephone surveys, faculty inquiries, and employer surveys. The resulting report is based on responses from 86% of the 1308 non-teaching graduates. A separate report is compiled on the graduates in Education.

Individuals seeking to use this data in career decision-making should always consult with a career counselor and/or other educational professionals.

### STATISTICAL REPORT CATEGORIES

Each graduate is counted only once, in spite of the fact that many complete multiple majors simultaneously. Individuals with more than one major are normally listed according to the major appearing first in our report from the Records and Registration Office. The asterisks and footnotes identify these occurrences in our statistical report.

#### Categories and their explanations:

- Total number of Graduates and Total number Seeking: These categories distinguish between the number of people graduating and the number who are entering the work force or going on for further schooling. Our percentages are calculated based on the total number of graduates seeking employment. This excludes the Not Seeking and No Report categories.

- Employed In Field: Individuals who report their work is related to their academic study, or who are working in a position that utilizes their college degree.
- Employed Out of Field: Individuals who report work that is not related to their academic study, or who are working in a position that does not utilize their college background.
- Further Schooling: Individuals who are continuing their education in graduate or professional programs, as well as those who are returning to school for an additional major, selected course work, or teaching certification.
- Military Service: Individuals who report their primary employment to be in a branch of the armed forces.
- Available: Individuals who are actively seeking employment, but have not yet accepted a position.
- Total Placed: Number of people who have secured some type of employment or who are continuing their education. (Reminder: percentage is calculated based on the number seeking employment/additional schooling, not the total number of graduates.)
- Not Seeking: People who report they are not entering the work force at this time. (Number not included in percentage calculations.)
- No Report: People whom we are not able to reach or who decline to participate in our report. (Number not included in percentage calculations.)

### DETAILED REPORT CATEGORIES

Information is organized alphabetically according to college and academic major with individuals' names omitted to maintain confidentiality. All types of employment are listed together (encompassing the statistical report categories of "employed in field", "employed out of field", and "military service"), followed by the list of further schooling reported. We list whatever information we acquire, and in some cases this is incomplete. Unless we are able to survey the graduate directly, it is often difficult to get all the details we request (job title, name and geographic location of the employer, type of additional education sought, school name and geographic location).

NOTE: Percentages were calculated based on the total number of graduates seeking employment, not the total number of graduates.

\*\* Due to double/triple majors, there were more graduates in this field than this number indicates. Students graduating with multiple majors are generally counted and listed with the major that appears first on the graduation printout from the Registration and Records Office.

# Thirty-one additional Biology majors are included with other majors in the College of Natural Resources.
