

Central Wisconsin Eco-municipalities

Communities working toward *economic and ecological sustainability*

Center for Land Use Education

September 2008

What is sustainability?

Sustainable development...meets the needs of the present without compromising the ability of future generation to meet their own needs

What is an eco-municipality?

A municipality that aspires to develop an ecologically, economically, and socially healthy community for the long term, using the Natural Step framework for sustainability as a guide, and a democratic, highly participative development process as the method. Eco-municipalities are developed locally to meet local needs

What is The Natural Step approach?

4 guiding principles for moving toward a sustainable society that were developed as a consensus by a Swedish children's cancer doctor and researcher and 50 ecologists, chemists, physicists, and medical doctors

What's happening in central Wisconsin?

The movement toward sustainability is quickly gaining momentum in Wood, Marathon and Portage Counties, as evidenced by the following events:

- In 2007, the **City of Marshfield** became an eco-municipality. They are implementing recommendations regarding transportation, water quality/quantity, and green buildings.
- In 2007, the **Commission for a Greener Tomorrow** was established as a non-profit organization dedicated to advancing the sustainable efforts of communities in the Greater Wausau area. It encourages greater awareness of sustainability issues to reduce waste, promote healthier lifestyles, adopt more environmentally-friendly practices and also capture cost savings where that is possible.
- In 2007, the **Sustainable Stockton** group in Portage County was created to strive to create and implement a shared, community vision for a sustainable future, by promoting a functional and healthy economic, ecological, and social climate.
- In 2008, the **City of Stevens Point** became an eco-municipality. Approximately 250 people shared their visions for a sustainable Stevens Point, and their ideas about specific actions to achieve these visions which are captured in the report *A Path to a Sustainable Stevens Point*.
- In 2008, **Citizens for a Clean, Green, & Welcoming Community** and the **Wisconsin Rapids Area League of Women Voters** hosted an eco-municipality forum and began study circles focused on making communities more sustainable.

GUIDING OBJECTIVES FOR A SUSTAINABLE SOCIETY, BASED ON THE NATURAL STEP FRAMEWORK

DEVELOP POLICIES AND PRACTICES THAT ULTIMATELY:

- ◆ Reduce dependence upon fossil fuels, extracted underground metals and minerals.
- ◆ Reduce dependence on chemicals and other manufactured substances that can accumulate in Nature.
- ◆ Reduce dependence on activities that harm life-sustaining ecosystems.
- ◆ Contribute as much as we can to the meeting of human needs in our society and worldwide.

Objectives of American Planning Association's Strategy for Planning for Sustainability, adopted April 2000.

A growing list of Wisconsin eco-municipalities

- City of Ashland
- City of Baraboo
- City of Bayfield
- City of Beloit
- City of La Crosse
- City of Madison
- City of Manitowoc
- City of Marshfield
- City of Menasha
- City of Neenah
- City of Sheboygan
- City of Stevens Point
- City of Washburn
- Douglas County
- Dunn County
- La Crosse County
- Town of Bayfield
- Town of Cottage Grove
- Village of Johnson Creek
- Village of Spring Green
