## Suggested Web Sites

# BIRDS

### All About Birds

[www.birds.cornell.edu/programs/allaboutbirds/](http://www.birds.cornell.edu/programs/allaboutbirds/)

Designed by the Cornell Lab of Ornithology, this site includes a video gallery, a guide to birdwatching, and a dynamic online bird guide complete with sound files of bird songs. Requires RealPlayer (free) to view the video and audio features.

### Avibase

[www.bsc-eoc.org/avibase/avibase.jsp](http://www.bsc-eoc.org/avibase/avibase.jsp)

Avibase is an extensive database information system about all birds of the world, containing over 2 million records about 10,000 species and 22,000 subspecies of birds, including distribution information, taxonomy, synonyms in several languages and more. This site is hosted by Bird Studies Canada, the Canadian copartner of Birdlife International.

# FISH

### Exotic Aquatics

<http://www.iisgcp.org/EXOTICSP/>

This project is designed to assist teachers with research-based information on Aquatic Nuisance Species (ANS) to be used in the classroom. Lessons plan include multi-disciplinary concepts correlated to state and national education standards

### Fisheries Learning on the Web (FLOW)

[www.projectflow.us/](http://www.projectflow.us/)

This is a comprehensive curriculum about the Great Lakes ecosystem, geared toward upper elementary and middle school. Lessons are aligned with science and social studies standards.

### Fish of the Great Lakes

[www.seagrants.wisc.edu/greatlakesfish/](http://www.seagrants.wisc.edu/greatlakesfish/)

This website from the University of Wisconsin Sea Grant Institute provides a wide variety of teaching materials and information on the fish of the Great Lakes. It features a kids' page with a database of fish profiles, updates on current Great Lakes initiatives and research news, and publications, including the full text of George C. Becker's book "Fishes of Wisconsin."

# REPTILES

## **AmphibiaWeb**

<http://elib.cs.berkeley.edu/aw/index.html>

AmphibiaWeb is devoted to collecting information about amphibians and promoting their preservation. Here you can search a database of the world's amphibians, learn facts and figures about them, and listen to a vast collection of recorded frog calls.

# AMPHIBIANS

## **Reveled and Revered**

[www.smithsonianeducation.org/educators/lesson\\_plans/herps/start.html](http://www.smithsonianeducation.org/educators/lesson_plans/herps/start.html)

This site for grades 3-8 uses five lessons to help students examine misconceptions about herps (the collective name given to reptiles and amphibians).
