POLLUTION

Air Pollution: What's the Solution

www.ciese.org/curriculum/airproj/

This is an educational project for students, grades 6 - 12, that uses online real time data to guide student discovery of the science behind the causes and effects of outdoor air pollution.

PathFinder Science: Keeping an Eye on Ozone

<http://pathfinderscience.net/ozone/>

Each fall students from all over the country participate in the Pathfinder Science research area, exploring ground-level ozone. Ground level ozone is believed to be the most ubiquitous air pollutant and the cause of much injury to the biosphere. Ozone is a toxic gas which is formed by a reaction between air pollutants and sunlight. This research area is design for upper elementary through high school age students. Two easy to follow, network-wide, standardized protocols are offered.

Toxtown

<http://toxtown.nlm.nih.gov>

Toxtown is an interactive guide to toxic substances commonly found in water, rivers, offices, stores, schools, parks, homes, and factories. Substances include arsenic, asbestos, carbon monoxide, lead, mercury, ozone, radon, and toluene. Created by the National Institutes of Health and Department of Health and Human Services.
