

Glacier National Park Virtual Field Trip

Stop 1 - Gunsight Lake & Vicinity: Activity 1

1. The vegetation in the two photos appears to have been disturbed. How has it been disturbed, and are there any patterns to the disturbance?
2. Take a look at the surficial geology map. What do you see in the region near the cabin that might explain what happened to the cabin?
3. Based on the evidence you have, why do you think the cabin is no longer in existence?
4. Look at the 1:24,000 topographic map of Gunsight Lake. What evidence on this map supports your contention?
