**A minimum of 120 college level credits is required to graduate with a bachelor's degree at UWSP along with specific university, general education, and major requirements. This major alone does not complete 120 credits, so students must either take elective courses to reach 120 credits or choose a minor to fulfill this requirement.

^Some classes can count for both CGER and major requirements. If CGER courses are not taken within the major required classes, then students will have to take those requirements as additional courses.

Graduation timelines are also affected by placement scores (ex. Math, English, etc.) and additional time may be needed than what is listed above.
