Title: Sampling and Aggregation Issues in Random Utility Model Estimation

Authors: Peter M. Feather

Journal: American Journal of Agricultural Econ., vol. 76

Date: 1994

Pages: 772-780(11/13/08 KB)H

Abstract:

This study is a highly technical review of subjectivity in travel cost models. The author considers a variety of economic models comparing random draw and aggregate approaches and data from a survey of Minnesota anglers. This study is best suited for individuals well versed in economic theory.
