Enrich Your Teaching and Learning with Hands-On Environmental Education

New Curriculum Constructed Around NGSS

Hands-On Activities

Get students excited about science through hands-on activities, rather than simply memorizing facts.

Meets NGSS Standards

The e-units are constructed around targeted performance expectations of the Next Generation Science Standards (NGSS).

Flexible Curriculum

Use activities as stand-alone investigations, or move through all the e-unit activities from beginning to end.

Thanks to a grant from PLT, the cost of this training has been reduced from $75 per person to $25 per person. For more information about the workshops, visit goo.gl/2TY3fp.

Choose from the following sessions:

- Oct. 2nd at UW-Superior; Energy in Ecosystems for 3rd-5th grade
- Oct. 3rd at UW-Superior; Carbon & Climate for 6th-8th grade
- Nov. 1st at UW-Madison Arboretum; Energy in Ecosystems for 3rd-5th grade
- Nov. 2nd at UW-Madison Arboretum; Carbon & Climate for 6th-8th grade

Note that each workshop runs from 12:00 to 5:00. Half-day substitute reimbursements are available—contact wcee-plt@uwsp.edu for details.
