

TESTS FOR PRIVATE WELL WATER

Bacteriological testing requires 24 hours setup time. The lab will not accept samples for bacteria analysis on any Friday or M.L. King Day, Memorial Day, July 3-4, Labor Day, Nov. 25-27, Dec. 23-Jan. 1 and March 25-26, 2021.

HOMEOWNER PACKAGE (Includes tests 1-8)..... \$55.00

This package consists of the following analyses which can be run separately for price indicated.

1. Total Coliform Bacteria (includes *E-coli* result when bacteria is present)..... 26.00
 Test the bacteriological safety of a water supply. **Priority analysis (48 hour turnaround)...52.00**
2. Nitrate plus Nitrite-Nitrogen 18.00
 These are the most common chemical contaminants in Wisconsin groundwater. They may also serve as an indicator of the presence of other contaminants, such as pesticides or trace organic chemicals from septic system effluent. **Priority analysis (48 hour turnaround)... 36.00**
3. pH 10.00
 Measure of relative acidity of the water. Useful in assessing the corrosivity of water to plumbing.
4. Alkalinity 12.00
 Amount of bicarbonate (*acid neutralizing capacity*), the major anion in water, related to pH and corrosivity.
5. Hardness..... 12.00
 Measure of the amount of calcium and magnesium carbonates. Important if water softening is considered.
6. Chloride 18.00
 Indicates contamination from septic systems, fertilizer, landfills, or road salt.
7. Conductivity..... 10.00
 Measure of total dissolved minerals in water. Change in conductivity or unusual ratio of conductivity to hardness may signal presence of contaminants.
8. Corrosivity Index..... 26.00
 This measures the tendency of water to be corrosive or scale forming.

Homeowner Package **plus Fluoride** (Requires an additional bottle.).....73.00

Fluoride 22.00

Bacteria Counts (Quanti-tray method)37.00

Provides an estimate of the number of bacteria colony forming units. Includes *E.coli* result when bacteria is present. This test can be useful if diagnosing or trouble shooting a well with a history of bacteria positive samples.

METAL PACKAGE (Requires an acidified bottle.) **52.00**

Individual metals are \$25 for one and \$9 for each metal added.

Arsenic (screen), Calcium, Copper, Iron, Lead (screen), Magnesium, Manganese, Potassium, Sodium, Sulfur (SO₄), and Zinc.

COMPREHENSIVE HOMEOWNERS PACKAGE (Call for bottles.) **135.00**

Includes – Homeowners Package, Metals Package (above) and DACT (atrazine screen)

Additional savings on our already discounted packages!

LOW-LEVEL LEAD AND ARSENIC (by ICP/MS) **50.00**

Priority analyses may be run on any of the above samples for double the listed price.

Please contact the lab to confirm availability prior to submitting samples.

PESTICIDE ANALYSES

Call the laboratory for bottles.

Diaminochlorotriazine screen (DACT) (a breakdown of atrazine and related herbicides)	33.00
Nitrogen and Phosphorus (N/P) containing pesticides	125.00
Chloroacetanilide Metabolites (CAAM) – 6 compounds.....	95.00
Nitrogen and Phosphorus containing pesticides + Chloroacetanilide Metabolites (NP/CAAM)	175.00
Neonicotinoid Insecticides.....	200.00

PHARMACEUTICALS AND PERSONAL CARE PRODUCTS..... 200.00

A screening tool to investigate the presence of human waste that may be impacting a well or surface water body. We test for 13 compounds including artificial sweeteners, antibiotics, and other personal care products.

WATER & ENVIRONMENTAL ANALYSIS LAB

DNR Certification No. 750040280

DATCP Certification No. 115097-D3

CERTIFICATIONS FOR NON-POTABLE WELL WATER – *alkalinity, ammonia, chemical oxygen demand, chloride, chlorophyll, fluoride, total hardness, Kjeldahl nitrogen, metals, nitrate, nitrate + nitrite, total organic carbon, orthophosphate, total phosphorus, total dissolve solids, total suspended solids, total residue, sulfate.*

CERTIFICATIONS FOR POTABLE WATER

Nitrate + Nitrite –N

Bacteria – coliform and *E. coli* (Quanti-tray, Colilert, or Colilert-18)
