The College of Letters and Science is dedicated to serving the region, state and globe by providing an inclusive academic environment for our students. The curricula offered across our disciplines are designed to foster our students' career preparation, professional expertise and civic responsibility both locally and globally. We believe that collaboration among faculty and students in the College of Letters and Science, along with collaboration with faculty in other UW-Stevens Point colleges and members of our regional community is vital to our students' success and growth and to the professional development of our faculty and staff.
