What if I’ve been exposed to a person with COVID-19?

- Wear a face covering
- Avoid close contact with others
- Practice physical distancing
- Practice good hand hygiene
- Self-monitor for COVID-19 symptoms
- Click HERE for more info.

Public health professionals interview people with a positive test. The interview identifies people at risk for infection. Identified people are notified by a public health contact tracer. If you are identified as at risk, the local public health department will contact you and provide you with further instructions.

Click for additional information on contact tracing.

No further action needed
