

ROOM FURNITURE

TRADITIONAL RESIDENCE HALLS

New dressers and desks are installed in the following buildings: Burroughs Hall, Hansen Hall, and Knutzen Hall. Baldwin Hall is scheduled for new furniture starting Fall 2026. Remaining replacement is planned over the next several years.

Furniture arrangement is for demonstration only. At move in, the bed will be set at a low height with the desk and dresser set to the side.

MEASUREMENTS

BED AND MATTRESS

Twin XL Loftable Bed Frame

External Measurements:
86\"L x 39\"D x 60\"H (max)

Internal Measurements:
80\"L x 39\"D x 56\"H
A standard futon fits within this space.

Loft height is adjustable to various heights, every 2.625"

Twin XL Mattress

80\"L x 38\"D x 6\"H

NEW FURNITURE

Three-Drawer Chest*

Exterior Measurements
36\"W x 24\"D x 26.875\"H

Interior Drawer Measurements:
33\"W x 21\"D x 6\"H

Desk, Black Metal Legs

42\"W x 24\"D x 30\"H

One-Drawer Mobile Pedestal

18\"W x 24\"D x 26.875\"H

Black Armless Chair

20.75\"W x 23\"D x 33\"H

CURRENT FURNITURE

Five-Drawer Dresser

30\"W x 24\"D x 45.25\"H

Desk with Hutch

42\"W x 24\"D x 53.75\"H

Black Armless Chair

20.75\"W x 21.75\"D x 32.5\"H

**Three-drawer chest meets new federal safety measures and still allows flexible room arranging.*

LOFTING YOUR BED

Note: All residence halls have black-steel lofts.

SELECT LOFT CONFIGURATION

Low Residential Height

High Lofted Height

Bunk Beds

The bed spring can be placed into the end rail posts at any height such as the low residential height, a high lofted height, or, using two bed springs, configured as bunk beds. Upon move in, and again at move out, each bed should be set to a low residential height. **Check with your roommate first before bunking beds. If bunking, you must keep the other two end rails in the room.**

ADJUST BED HEIGHT

Note: While gently tapping with a rubber mallet may help dislodge a stuck spring hook, typically no tools are required.

Note: The bed spring has two hooks on each corner that insert over steel rods in the end rail posts.

When changing your bed height or configuration, it is important to disengage **both hooks** on each corner of the bed spring. If both ends are not disengaged, damage to your bed may occur. To disengage the spring, lift upwards while one foot is firmly placed on the lower cross rail. Sometimes an upward tapping under the corner connection will be needed to dislodge the spring hooks from the steel rods. **Several rubber mallets are available to check out for free at each building's front desk.**

STAY SAFE

Safety Guard Rail

In order to prevent injury or property damage, it is strongly recommended that all bed adjustments are conducted by at least two individuals.

Safety guard rails are highly recommended for **ALL** spring heights. To attach the guard rail, slide the mattress so the guard rail can lay flat on the spring. Engage the two brackets of the guard rail to the spring and raise it to the vertical position. The mattress can now be repositioned which will hold the guard rail in its upright position.

UW-Stevens Point is accredited by the Higher Learning Commission (hlcommission.org), a regional accreditation agency recognized by the U.S. Department of Education.
