Using your Clicker

Your clicker is always on, it’s just asleep.

To respond to a polling question with your clicker,

1. Choose your answer from the list of responses shown on the projector screen, then...
2. Press and release the corresponding number/letter on your clicker.

Your clicker will display your response briefly on its LCD screen. It will then go back to sleep to wait for the next response.

Troubleshooting:

If your LCD screen displays anything other than your answer, press the Menu button several times – until your screen displays “Presentation Mode”. Let your clicker fall back to sleep. You can then continue polling.
