GIS Certificate, 2017

GIS Marketing Intern Wausau Chamber of Commerce

Aaron Willems

"With GIS and story mapping techniques, I created the Wausau Digital Concierge for the Wausau Region Chamber of Commerce. It is an online map application for the desktop, tablet or smartphone. The tool offers a personal guide to the Wausau River District and is designed to help tourists and visitors plan a night on the town or a weekend to remember."

GIS & Spatial Analysis Minor, 2017

Land Records Intern Pepin County, Wisconsin

Yoon Bin Bae

"For the Department of Land Management and Land Conservation, I'm using GIS in the fields of zoning, surveying, emergency management, economic development, and tourism. I'm using GIS for property inspections, floodplain research, agricultural crisis vulnerability assessment and natural resource management, organizing land records and deeds, mapping school districts, managing address points, and advancing Pepin County tourism. GIS and geospatial thinking are fundamental components in various work fields and are essential to advance creative and logical thinking."

B.S. Geography, 2010

Right-of-Way Agent Green Bay, Wisconsin

Nicole Barbiaux

"Acquiring a geography major from UWSP has brought me experiences and education that has proven to be irreplaceable. Since graduating, I have held jobs in both the private and public sectors in multiple states. My education has allowed me to work in the forestry, government, transportation, and utility industries. I would not be where I am today without geography from UW-Stevens Point."

B.S. Geography, 2014

Real Estate Specialist
City of Green Bay, Wisconsin

Kenneth Rovinski

"I am a Real Estate Specialist with the City of Green Bay. I administer housing development programs that include the acquisition and redevelopment of blighted properties, the distribution of grants for infill development, and the facilitation of other commercial and residential transactions. Human Geography gave me the tools I need to be successful in my career and developed important life skills molding me into the person I am today."

GIS & Spatial Analysis Minor, 2017

GIS Analyst-Intern Courte Oreilles Lakes Association

Janelle Taylor

"The GIS and Spatial Analysis Minor provides me with the body of knowledge to apply high-tech tools to protect a rare fishery on Lake Lac Courte Oreilles, in Sawyer County, Wisconsin. I'm using spatial analysis techniques to identify landscape features that are vulnerable to erosion during forest harvest. I'm also crafting online story maps that inform land owners and consulting foresters about the benefits of implementing forestry best management practices to protect the fishery."

David Johnson

"Geography and GIS offer a profound perspective of the world that helps me analyze and explain complex electrical systems and translate them into a format, the map, which people more readily understand. GIS delivers location intelligence to our company's decision-making process, helping serve our members with more efficient and effective services."
