- Understand essential concepts in object-oriented programming such as classes, objects, and inheritance
- Build simple GUI applications using JavaFX
- Develop Java programs to solve problems close to real world applications

Prerequisites

- CNMT 101 (Introduction to Computing and Programming)

Textbook

- Starting Out with Java – From Control Structures through Objects, 7th Edition, By Tony Gaddis, Publisher: Pearson

Grading

- 7 Labs: 49%
- 2 Tests: 18%
- Final Exam: 28% (Comprehensive)

Students with Disabilities

If you require accommodation based on disability, please contact the disability office and me during the first week of the semester to ensure that you are appropriately accommodated.

Academic Misconduct

You are encouraged to discuss assignments with each other and to seek assistance from myself.

However, since assignments are a part of the final grade in the course, you must limit the amount of assistance you receive. Such assistance must be limited to a verbal discussion of the approach to an assignment, and may not include substantive solution of the assignment by the person providing the assistance.

If you submit an assignment which is in whole or in part the work of another person or persons, then you, and any such other person or persons whether enrolled in the class or not, will be dealt with as prescribed by Chapter UWSP 14 of the Rules of the Board of Regents of the University of Wisconsin System, Wisconsin Administrative Code.
