

Neuromotor Speech Disorders

CSD 724, 2 credits

Fall 2023 Syllabus

Class meeting time: Wednesdays 8:30 am to 10:10 am, beginning on 9-6-23.

Professor: James Barge M.S. CCC-SLP jbarge@uwsp.edu

Office: 042b

Office Hours: Pending clinic scheduling. Will be announced during week two.

Course Description: This course examines developmental and acquired dysarthria and acquired apraxia of speech (AOS) in the following areas: neurologic etiology; differential diagnosis; assessment and intervention.

Required Textbook and Resource

Freed, D. B. (2020). *Motor Speech Disorders: Diagnosis and Treatment* (3rd ed.). San Diego, CA: Plural Publishing.

Plural+Plus Companion Website, *Motor Speech Disorders: Diagnosis and Treatment* (3rd ed.).

Learning Objectives:

Through this course, students will:

- | |
|---|
| <ul style="list-style-type: none">• Demonstrate knowledge of dysarthria and acquired apraxia of speech, including etiologies and characteristics. |
| <ul style="list-style-type: none">• Demonstrate current knowledge of principles and methods of motor speech assessment for children and adults, including appropriate assessment procedures, adaptations to meet the needs of individual receiving services, culturally competent assessment approaches, and strategies for collaborating effectively with individuals with motor speech disorders, their family members, and other communication partners. |
| <ul style="list-style-type: none">• Demonstrate current knowledge of principles and methods of motor speech intervention for children and adults, goal setting, instructional procedures, evaluation of progress, and strategies for collaborating effectively with individuals with motor speech disorders, their family members, and other communication partners. |
| <ul style="list-style-type: none">• Demonstrate current knowledge of principles for effective, culturally competent motor speech services and interprofessional team-based collaboration. |

Course Outcomes

Upon successful completion of this course, as determined by course participation and course requirements, you should meet the following 2020 ASHA Standards. All of these standards must be met, or you will receive an incomplete grade in the course until they are met. A grade of “B” or better is required to meet the standards.

2020 ASHA Standards related to CSD 724 course content are *underlined and italicized*, see <https://www.asha.org/Certification/2020-SLP-Certification-Standards/> for additional information about SLP standards.

Standard IV-C: The applicant must have demonstrated knowledge of communication and swallowing disorders and differences, including the appropriate etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates in the following areas: *• speech sound production, to encompass articulation, motor planning and execution, phonology, and accent modification; • fluency and fluency disorders; • voice and resonance, including respiration and phonation; • receptive and expressive language to include phonology, morphology, syntax, semantics, pragmatics (language use and social aspects of communication), prelinguistic communication, paralinguistic communication (e.g., gestures, signs, body language), and literacy in speaking, listening, reading, and writing; • hearing, including the impact on speech and language; • swallowing/feeding, including structure and function of orofacial myology, oral, pharyngeal, laryngeal, pulmonary, esophageal, gastrointestinal, and related functions across the life span; • cognitive aspects of communication, including attention, memory, sequencing, problem solving, and executive functioning; • social aspects of communication, including challenging behavior, ineffective social skills, and lack of communication opportunities; and • augmentative and alternative communication modalities.*

Standard IV-D: Prevention - Identify causes and risk factors for neuromotor speech disorders.

Assessment: List examples of formal and informal neuromotor speech assessment tools. Intervention: Explain intervention approaches for people with dysarthria and AOS.

Standard V-B: 1. c. Administer, score, and interpret tests designed to assess neuromotor speech disorders. 2. Make treatment decisions based upon the results of clinical and instrumental assessment results and evidence in the literature.

Recommended Resources

Yorkston, K. M., Miller, R. M., Strand, E. A., & Britton, D. (2013). *Management of speech and swallowing in degenerative diseases* (3rd ed.). Austin, TX: PRO-ED.

A neuro for SLP textbook such as:

LaPointe, L. L. (2012). *Atlas of Neuroanatomy for Communication Science and Disorders*.
New York: Thieme Medical Publishers.

Felton, D. L., & Summo Maida, M. (2019). *Netter's neuroscience coloring book*.
Philadelphia: Elsevier.

Canvas

The syllabus, PowerPoint handouts, resources, assignments, exams, and grades will be available on Canvas.

Course requirements

1. **Exam 1:** 20% of final grade.
2. **Exam 2:** 20% of final grade.
3. **Exam 3:** 20% of final grade.
4. **Assessment Assignment:** This assignment will be worth 20% of your final grade and is due **10/8/2023**.
You will work in groups of 2 or 3. You will learn, administer, score, and interpret the AIDS and ABA-2 assessments for dysarthria and apraxia. You will turn in the completed test forms as a group for 20% and individual reflections (see explanation below) for 10%.

Reflections: Turn in the completed assignment checklist, AND a 1-2 page double-spaced typed reflection paper describing what you learned from completing this assignment and what role you played in the group assignment (e.g., I administered the AIDS and was the patient for the ABA-2).

5. **Treatment Assignment:** This assignment will account for 20% of your final grade and is due **12/10/2023**.
You will be assigned a fictional individual with a specific motor speech disorder. The features and extent of the motor speech deficits will be provided. You will **write one long-term goal and two short-term goals** to address your patient's motor speech concerns. For each short term goal you will provide a **specific motor speech treatment approach for each short-term goal, an explanation of how this treatment approach is performed, and the rationale of its selection** in this individual's case.

Grades

I determine grades by converting accumulated points into percentage scores. I assign percentage scores to letter grades as follows. A grade of 'B' or higher is considered passing in this graduate program.

A	95-100	B-	80-82
A-	90-94	C+	77-79
B+	87-89	C	73-76
B	83-86	C-	70-72

Student Concerns

If a student has a concern about a course or instructor, the first step is to talk to the instructor. If the situation remains unresolved, the student should talk to the Department Chair of the department in which the course is taught.

Expectations of students taking this course:

1. Attendance of all scheduled classes for this course. You are responsible for all material presented in class. Please contact the instructor if you will be unable to attend class.
2. Behavior and demeanor should reflect your close proximity to becoming a licensed professional Speech Pathologist.
3. Completion of *all required readings* and stay current with your readings and assignments to perform your best on course requirements. The textbook is another source of content for you in this course. The expectation of you will be to take notes and be familiar with the resources from the textbook.
4. Completion of all course requirement due dates. You must contact Mr. Barge before missing a deadline.
5. Clear and concise written language for all course requirements. Written correspondence is often the method of communication among professionals. Your written language reflects your knowledge, attitude, dedication, and work ethic. Assignments are graded on language content (vocabulary, word usage) and writing style (spelling, grammatical structure, paragraph cohesion). Anyone needing help with written language is encouraged to contact Mr. Barge early in the semester to discuss ways to improve your written expression. You may consider making an appointment at the Tutoring-Learning Center located in the University Learning Resources Center, 715-346-3568.

6. Inform Mr. Barge regarding any disability that may impact on your performance in this class. All necessary accommodation for each student according to their needs. Students with disabilities should contact the Office of Disability Services during the first 2 weeks of the semester to request accommodation.
7. Notification of Mr. Barge on the first day of the semester to request a change to course requirements for religious beliefs according to UWS 22.
8. Please note that lecture materials and recordings for CSD 724 are protected intellectual property at UW-Stevens Point. Students in this course may use the materials and recordings for their personal use related to participation in this class. Students may also take notes solely for their personal use. If a lecture is not already recorded, you are not authorized to record my lectures without my permission unless you are considered by the university to be a qualified student with a disability requiring accommodation. [Regent Policy Document 4-1] Students may not copy or share lecture materials and recordings outside of class, including posting on internet sites or selling to commercial entities. Students are also prohibited from providing or selling their personal notes to anyone else or being paid for taking notes by any person or commercial firm without the instructor's express written permission. Unauthorized use of these copyrighted lecture materials and recordings constitutes copyright infringement and may be addressed under the university's policies, UWS Chapters 14 and 17, governing student academic and non-academic misconduct.
9. An expectation of class participation. Students are expected to ask for clarification if they do not understand a question posed in class, the directions for an in-class activity, and/or instructions related to an assignment.

Safety Information

- Please keep these same healthy practices in mind outside the classroom.
- *In the event of a **medical emergency**, call 911 or use red emergency phone located in the middle hallway in the department. Offer assistance if trained and willing to do so. Guide emergency responders to victim.*
- *In the event of a **tornado warning**, proceed to the lowest level interior room without window exposure which is the middle hallway in the department. Avoid wide-span rooms and buildings.*
- *In the event of a **fire alarm**, evacuate the building in a calm manner. Meet at the College of Professional Studies Sign on the Fourth Avenue. Notify instructor or emergency command personnel of any missing individuals.*
- **Active Shooter** – *Run/Escape, Hide, Fight. If trapped hide, lock doors, turn off lights, spread out and remain quiet. Follow instructions of emergency responders.*

See UW-Stevens Point Emergency Management Plan at www.uwsp.edu/rmgt for details on all emergency responses at UW-Stevens Point

Course Schedule

<u>Date</u>	<u>Topic</u>	<u>Resources</u>
9-6	Course Introduction	Chapter 1 Text Neurologic Substrates of Motor Speech Disorders
9-13	Motor System	Chapter 2 Text
9-20	Evaluation of MSD	Chapter 3 Text
9-27	Evaluation of MSD	Chapter 3 Text
10-4	Examination 1	
10-11	Flaccid Dysarthria	Chapter 4 Text
10-18	Spastic Dysarthria	Chapter 5 Text
10-25	Unilateral Upper Motor Neuron Dysarthria	Chapter 6 Text
11-1	Ataxic Dysarthria	Chapter 7 Text
11-8	Examination 2	
11-15	Hypokinetic Dysarthria	Chapter 8 Text
11-22	Hyperkinetic Dysarthria	Chapter 9 Text
11-29	Mixed Dysarthria	Chapter 10 Text
12-6	Apraxia of Speech	Chapter 11 Text
12-13	Apraxia of Speech	Chapter 11 Text
TBD	Examination 3
