

Learning (Psyc 375)

Section 2 (MW 3:30-4:45pm) Spring 2019 Syllabus

Instructor: Dr. Jody Lewis

Office: D-233 Science Building

Office hours: T/TH 11-12pm or by appointment

Phone: 715-346-3675

e-mail: Jody.Lewis@uwsp.edu

The goals of this course are to:

1. understand and practice identifying the principles of learning

- 2. help you to develop the skills needed to study behavior as a science
- 3. illustrate how studying animal behavior can benefit the understanding of human behavior
- 4. recognize how the knowledge obtained in the lab can be applied to understanding, and controlling behavior outside the laboratory

Teaching philosophy and classroom expectations:

- I do not make judgments about a student's character based on their grades/performance in my classes.
- I do care very much about my teaching, how I run a classroom, and will do anything I can to help you get the best possible grade in this course.
- My goal in life is NOT to give busy work, torture students, and make their lives miserable –really, I have better things to do with my time.
- I consider all students adults, which means that I believe that students are able to make decisions for themselves, have a life outside the classroom, and if students need help, they will come to me (I do not chase students around and I don't monitor their attendance closely).
- I think students learn more and get more out of a class when they read the book and come to class and participate in class.
- I expect that students will ask questions in class if they need me to repeat something, clarify what I said, and/or are curious about something
- Learning should be fun and relaxing, but difficult. Very few of us have sponge-like brains, so if you want to learn something you have to work hard.
- Please do not take video or audio recordings of me without my permission. I consider this not only CREEPY but a violation of my privacy.

Class Materials

Text: Powell, Symbaluk, and MacDonald (20017) Introduction to Learning and Behavior 5th Edition. You may read the assigned reading in the book before or after lecture. I would highly suggest both.

Articles: Hard copies of articles for discussions will be available in class. Electronic copies will be available through D2L.

Psyc 375 2

Internet Sources:

1. Course material will be provided through Desire to Learn (D2L). This will include the syllabus, lecture outlines, outside reading assignments, and anything else I come across that may be interesting and/or useful for class.

2. The textbook student companion site is a great resource for practice exams, and other study aids. (This link will be available through D2L)

Course requirements

Exams: There will be three exams over material covered in lecture, the textbook, assigned readings and projects. I will provide make-up exams with a legitimate, documented excuse and <u>if you contact me</u> <u>within 24 hours</u> of the scheduled exam.

Assignments:

Research assignments: In order to have exposure to how research is conducted in learning, students will be expected to read and discuss 3 research articles. Students will be expected to take a brief online quiz to provide evidence that they read the article and then participate in a group discussion about each article.

Application assignments: In order to help students practice ideas about how learning can be used in practice, students will be assigned 9 short application assignments over the course of the semester. Application assignments will be worked on during class. Each assignment is to be typed (I will not accept hand written assignments) and is due no later than 1 class period after it is assigned. All assignments will be posted on D2L the day that they are assigned for those students who have to miss class the day it is assigned. For student who must miss class the day the assignment is due, there will be a D2L dropbox available to hand in assignments. The two lowest assignment grades will be dropped. Because of this, I will not accept late application assignments.

Grading: Your grade is based on the number of points earned in the class.

Point distribution:

Exams (80 pts x 3)	240pts	70%
Research assign (20pts x 3)	60pts	17%
Article discusion quizzes (5pts x3)	15pts	4%
Application assign (5pts x 7)	35pts	10%
Total	350pts	100%

Lette	er grade cutoffs:
A A-	93%-100% 90%-92%
B+	87%-89%
В	83%-86%
B-	80%-82%
C+	77%-79%
C C-	73%-76% 70%-72%
D+	70%-72% 67%-69%
D.	60%-66%
F	<60%

Quiz rules for Learning Articles

What material will I be quizzed on?

- Each quiz will cover the article assigned for discussion
- The main purpose of the quizzes is to prove that you have read the article
- The questions should be easy if you have read the article
- Before taking the quiz you should be able to answer the following questions:
 - o What is the purpose of the study?
 - o What are the variables and how were they manipulated/measured?
 - o What were the major findings of the study?
 - o What were the authors' conclusions?
 - o What does this paper have to do with learning?

What will the quiz consist of? Is there a time limit?

- Each quiz will consist of 5 multiple choice questions (1 point each)
- Once you start the quiz, you will have <u>7 minutes</u> to complete it
- Because you have a limited amount of time, you should read the article before you take the quiz and not skim the article for the first time during the quiz

When should I take a quiz?

- Each quiz will be available for 7 days
- You may take the quiz at the time that is most convenient for you during those 7 days
- Each online quiz will be available on D2L one week before a scheduled article discussion
- You must take the quiz by 3 pm on the Wednesday before the article discussion
- I recommend that you take the quiz early, rather than later (i.e. at the last minute) in case something goes wrong with your computer or something comes up in your life

What if something goes wrong with my quiz?

- Occasionally students will see an error message or be booted out of the quiz (especially when the quiz is taken in the middle of the night)
- If you have an error, try to go back into the quiz to answer the questions and submit the quiz before on time. You may have to try this several times
- You will not be penalized for computer malfunctions. If your quiz is late because of errors, send me an e-mail, tell me what happened and I can remove the late penalty.
- I will remove late penalties no more than once during the semester. If you receive errors repeatedly I suggest that you try another time or computer to finish your quizzes.

Can I use any materials when I take the quiz?

- You may use the article, textbook, and class notes
- You must complete the quiz individually. You may NOT work together, or get help from others inside or outside of class. GETTING HELP OR WORKING TOGETHER IS <u>CHEATING</u>

Additional course information

Attendance: Attendance is expected in this class. I do not keep a written record of attendance, however, my experience is that students do not perform well in a course if they miss a lot of classes. Please note that you will be responsible for any lecture material, announcements, or schedule changes given during class time.

Academic honesty: I <u>do not</u> tolerate violations of academic honesty such as cheating, plagiarism, and copying/buying papers off the internet. <u>You</u> are responsible for understanding and abiding by the university academic standards. Instances of academic dishonesty may result in the <u>failure of the course</u>. Please see Chapter 14, *Student Academic Standards and Disciplinary Procedures* of the UWSP Community Rights and Responsibilities. This can be found at http://www.uwsp.edu/centers/rights/

Disability accommodation: Please contact me and Disability Services during the first two weeks of the semester if you are in need of any additional accommodations (346-3365).

Religious accommodation: Religious beliefs will be accommodated according to UWS 22.03 as long as you notify me within the first three weeks of the beginning of class of the specific dates on which you will request relief.

Tutoring-Learning Center: The center provides assistance such as group and individual tutoring, help with computer skills, and help with writing papers. They are located in 018 LRC (346-3568). They can also be found at http://www.uwsp.edu/tlc/

Withdrawal policy: If you decide you no longer want to take the course you must follow the university procedures for officially dropping the course. If you stop attending and do not officially drop the course you will receive an F in the course. See the Registration and Records webpage for information about when the last day is to drop a course (click on Registration Dates and Information). http://www.uwsp.edu/reg-rec/
